WORK EXPERIENCE

Orderify (Samos, Greece)

Developer

August 2015 – Ongoing

Orderify is an application designed for every kind of Restaurant, Cafe or Bar that gives the owner, waiters and even the customers the opportunity to send their own orders. Its main advantage is the fact that the owner can customize the application's menu the way they prefer without occupying the developers and changing the applications backend. Furthermore, the owner has full remote access to its functions and statistics giving them the ability to manage anything and at any given time.

VR-Hunt (St. Gallen, Switzerland)

Owner & Developer

March 2017

VR-Hunt is a game we designed that combines 1 Steering Wheel device, 2 VR devices, both provided by Logitech, and as many mobile devices as the server host wishes to include in his game. There are two main players who use the Steering Wheel and the VR devices to drive and shoot from their car while all the other players try to shoot them using their mobile devices.

▪ **2nd Place at the Game Development Challenge by Logitech at START Hack 2017**

Emergy (Athens, Greece)

Owner & Developer

May 2017

Emergy is a cross-platform application (Android, iOS, Windows Phone) that everyone can use to instantly send a signal containing their current position to the appropriate service (Police Department, Hospital, Fire Department) in case of an emergency at an unknown location.

StudentGuru University of the Aegean (Samos, Greece)

Microsoft Candidate Student Partner

October 2017 - Ongoing
